PROFILE

A proactive and collaborative professional with experience in strengthening cooperation between students and companies in the Jyväskylä region. I have worked closely with students to organize career trips, provide consulting through university programs and events and facilitate networking through them such as **Hackathons**. Additionally, I have worked in customer service at **#Digikeskus** in **Viitasaari**, supporting local residents by solving everyday challenges using AI-based solutions.

EDUCATION

Master's Degree in Fullstack Software Development
JAMK University of Applied Sciences – Jyväskylä
August 2023 – Dec 2025 (Expected)

 + Focus on modern full-stack development, combining front-end and back-end programming

+ Participated in Hackathons and coding challenges to build innovative web applications

+ Engaged in developer meetup groups and student-led sessions

+ Studied agile methodologies and project management

PROJECTS (GITHUB)

Student Weblog Page
A full stack weblog for students to put their news related to their studies and share with others.

TrioTalk
 A website that helps students communicate with each other and learn languages through artificial intelligence-based conversation.

EXPERIENCE

1. Project Specialist
Kehittämisyhtiö Witas Oy – Viitasaari, Central Finland, Finland
June 2025 – Present

- Planned and managed agile development projects focused on regional innovation and startup support.
- Provided consulting services to startups and entrepreneurs in collaboration with local stakeholders.
- Facilitated student engagement through events such as Hackathons and university workshops.
- Supported local residents at Digikeskus by offering AI-based solutions to everyday challenges.
- Coordinated networking activities between students and companies to enhance employment opportunities.
- Utilized project management tools and methodologies to ensure timely and effective project delivery.

2. Software Developer and AI Specialist
Creative Tech Solutions, Web Division and AI Driven Solutions
June 2023 - Present

- Collaborated with designers to create user-friendly interfaces for web applications.
- Conducted code reviews, ensuring high-quality software development and adherence to best practices.
- Assisted in troubleshooting and debugging, maintaining system performance.
- Participated in daily stand-ups, fostering effective team communication.

VOLUNTEER EXPERIENCE

Assistant Finnish Language Instructor (Internship)
- **Multicultural Center Gloria – Jyväskylä, Finland**
August 2023 – September 2023

- Assisted new immigrants in their Finnish language learning journey.
- Supported classroom activities and provided one-on-one guidance.
- Gained practical experience in language instruction and cross-cultural communication.
- Deepened understanding of Finnish language and culture through active engagement.
